

Spring into Summer with the New Lalie Design Fabric Collections

The new Spring Summer 2011 **Lalie Design** fabric collections are now available from **House Couturier**, and embrace every trend for the coming season, offering up a wealth of interior design options to help you leap into summer.

Choose from fresh, flirty floral designs such as **Comme Neige** and **Fleur de Coton**, or opt for the more vibrant patterns of the architectural **Comme de Provence** or the carnival themed **Percussion**, which taps into the trend for crisp white bases spiked with absinthian yellows and limes, rock candy and syrupy pinks.

The unique colour combinations of Lalie Design's more graphic fabrics mean they can be paired with existing home décor schemes and used to add a fresh, punchy update to your interior. The designs are spicy, gregarious and persuasive, conjuring up feelings of faraway lands and localities.

Lalie Design's fresh contemporary twist on traditional floral designs offers a quintessential neutral that can be relied upon to co-ordinate with existing interior design schemes, while offering an instant update to tired winter hues.

All the fabrics are 100% cotton, and can be used for upholstery, curtains and blinds, as well as scatter cushions for your home.
